

T0003 – Top 10 Users

This report identifies the top 10 BI Users during the last 90 days. These individuals are of interest because they may be the most knowledgeable BI users or in other words the power users. They are ranked by the report execution factor (multiplying the number of distinct named reports by the number of executions) for each user during the reporting period and selecting those that have the largest report execution factor. The report provides information such as the individual's name, how many report iterations they have run, and the average amount of time per day they spend running reports.

*(Standard Report)

Employee Name	Execution Factor	Number of Reports	Number of Executions	Average Time Spent Per Day
#	187	11	17	5.714
CREECH, WINNIE	35	5	7	1.554
